FR Aluminum Horizontal Blinds

Hunter Douglas created the industry's first Aluminum Horizontal Blinds, and we keep finding ways to make them better. Our spring-tempered aluminum slats offer best-in-class resilience to withstand the toughest treatment. We offer an innovative range of finishes and dozens of colors, including our Thermostop[®], perforated, and mirror finishes.

Shading Strategy

Hunter Douglas FR Aluminum Blinds help create environments that are comfortable, healthy, productive, and sustainable. Our products are constructed to minimize environmental impact while meeting the highest standards for industrial, institutional, and commercial applications.

A DAYLIGHT

Contact with the outdoors is a proven factor in employee productivity. Windows offer views and admit plenty of daylight. When tilted, horizontal blinds can reflect that light deeper into a space, spreading the benefits among more people and reducing dependence on artificial lighting.

B GLARE CONTROL

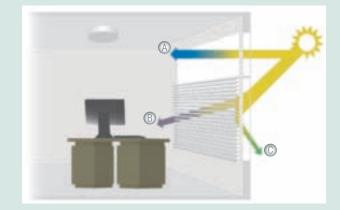

A range of slat spacings allows you to control how much light falls into a workspace, to eliminate glare and reflections. Perforation options help optimize use of natural light, ensuring visual comfort by reducing glare without blocking the view.

© MANAGEMENT OF THERMAL GAIN

Window coverings manage heat generated by the sun: when it is hot, they can be closed to minimize solar heat gain; when cold, they can be raised to allow solar heating.

AESTHETICS

Blinds filter daylight to create even, glare-free lighting levels within a space. They also ensure privacy and can provide a consistent look from the exterior of a building.

INDOOR AIR QUALITY

Poor air quality is a common source of employee concerns. All the components and slats in our blinds – including paints and other finishes – are certified for low emissions by the GREENGUARD Environmental Institute. Hunter Douglas FR Aluminum Blinds pass both the standard emissions and the stricter requirements for GREENGUARD Gold certification.

2

Hunter Douglas Architectural provides flexible control of virtually any motorized product on projects of any size. Our state-of-the-art components can be mixed in a given installation without limitations. They offer advanced controls for the highest levels of function and reliability.

By responding to changing conditions, automated blinds deliver a number of important enhancements to building efficiency and performance:

DYNAMIC MANAGEMENT OF THERMAL GAIN

Intelligent automated systems can position blinds based on the orientation of the sun.

INCREASED ENERGY EFFICIENCY

Automated systems contribute to energy savings by managing the amount of light and heat that comes through the window. Using natural light instead of artificial lighting can lead to energy savings.

AESTHETICS

Automated blinds provide a uniform look to the exterior of a building.

CONVENIENCE

Motorized blinds provide greatly improved convenience for user operation, eliminating the need to manipulate cords or rods. In addition, automated shades can improve performance of the shading system as a whole, as studies show that most people do not open and close shades in response to changing conditions outside.

Benefits

Our Aluminum Horizontal Blinds offer best-in-class durability, excellent value, reliable performance, and a wide range of options for commercial and contract applications.

INNOVATIVE DURABILITY

Bounceback slats with heat-treated, spring-tempered aluminum for best-in-class durability.

RELIABLE HARDWARE

Durable operating systems and slats ensure consistent performance.

SUPERIOR LIGHT CONTROL

A range of tape spacings, perforated slats, and our de-Light[™] feature allow you to specify any level of light control.

SUSTAINABLE CONSTRUCTION

Slats contain 95% recycled aluminum and are certified for low emissions by the GREENGUARD Environmental Institute and passes the stricter requirements of GREENGUARD Gold.

ENERGY EFFICIENCY

Tilted blinds diminish dependence on artificial lighting, allowing light to reflect deeper into a space. Thermostop[®] coatings reduce heat transfer by 30%, contributing to significant energy savings.

UNMATCHED CUSTOMIZATION

Variety of aesthetic and performance options for any application.

LOW MAINTENANCE

Proprietary anti-static Dust Shield[®] finish and closed oval bottom rail inhibit dust buildup.

VERSATILE MOTORIZATION

Range of motorization and control options to maximize shading benefits.

COLORS AND FINISHES

Durable aluminum alloy slats are available in a wide selection of colors.

PRODUCT DETAILS

Standard features include box brackets, crash-proof cord lock, closed oval bottom rail, cord stop to single pull cord, and slip clutch tilters.

LIFETIME GUARANTEE

Model Selection

Aluminum horizontal blinds can be selected based on headrail dimensions, slat gauge, and tape spacing for individual projects.

Headrail

Headrail styles differ based on functionality and aesthetics – from the decorative beveled CD, to the industry-standard CL, heavy-duty CE and sturdy H2.

	Gauge
SIAT	
Olar	Gauge

Heat treated, spring tempered aluminum slats are available in heavyduty .008" gauge and industry standard .006" gauge.

Model Selector				
MODEL	SLAT SIZE	TAPE SPACING		
CD 1"	1 ³ / ₈ "x 1 ³ / ₈ " Dec	orative Beveled Headrail

H282	2" x .008"	42mm de-Light™		
H2TN	2" x .008"	42mm School Blind		

Tape Spacing

Tape spacing options offer various levels of light control and view through.

Superb design, excellent value, and resilient construction make CD blinds an ideal choice for many architects, specifiers, and designers. The attractive design of the beveled steel headrail eliminates the need for a separate valance. Model CD88 features heavy-duty 1" x .008" slats, as well as our highest level of light control with tape spacing at just 18mm and de-Light[™] feature to eliminate light leakage through routing holes.

Product Details

- Headrail 13/8"
- Aluminum alloy slats, heat treated and spring tempered
- Slip clutch tilter
- Widths 101/2" 144" *
- Heights to 144" **
- Braided Ladders: 100% polyester yarn color compatible with slats **
- Designer headrail (no valance needed)
- Box brackets
- Crash proof cord lock
- Closed oval bottom rail
- Cord stop to single pull cord
- * Minimum widths between $8\frac{1}{2}$ " IB (8" OB) & $10\frac{1}{2}$ " available. Surcharges and guarantee exclusions apply.
- ** Heights in excess of 144" available. Surcharges and guarantee exclusions apply.

CD62 1"	.006"	22 mm	Industry standard
CD80 1"	.008"	20 mm	Superior
CD82 1"	.008"	22 mm	Industry standard
CD88 1"	.008"	18 mm	Ultimate, de-Light™ feature

Design Options

Hidden brackets, limited tilt to control closure, motorization, perforated slat (.008" only).

A proven performer for contract and commercial applications, the CL aluminum horizontal blind is often specified as the industry standard. The sturdy 1" x 1" x .024" steel headrail accommodates narrow mounting depths. Model CX80 provides superior light control with 20mm tape spacing and heavy-duty 1" x .008" slats. With its 5%" slats, the CHM82 micro aluminum horizontal blind offers a distinctly different look.

	111 -	
Model CE 1" Heavy Duty Headrail		

Ideal for larger installations, our CE aluminum horizontal blinds feature our sturdiest headrail for 1" blinds. The steel headrail measures 1" x 1½", offering extra durability for openings up to 144" x 144". This blind's distinctive look and solid hardware ensure years of reliable service without sacrificing aesthetics. Model CE80 provides superior light control with tighter 20mm tape spacing and heavy-duty 1" x .008" slats.

8

Offering maximum strength and retro styling, our H2 blinds give the traditional look of 2" slats. The H2TN (School Blind) is optimized for the design and durability requirements of academic institutions, with sturdy vinyl tapes, 2.2mm cords, and cord tilt. The blind features heavy-duty slats of .008" aluminum and a low-profile steel headrail measuring $1\frac{1}{2}$ " x $2\frac{1}{4}$ " x .024".

Hunter Douglas Architectural aluminum blinds meet even the most demanding requirements of office, school, and commercial environments. Our blinds feature a wide range of design options to meet your needs.

	Limited Tilt Available on CL, CD and CE blinds	 Maintains uniform look from exterior Reduces thermal stress in glass glazing systems Allows proper clutch-tilter operation to stop over-rotation, damage to blind Available in 60/60 degrees equal tilt
	Pivot Plates Available on CL and CE blinds	 Eliminate the need to drill and screw directly into the mullion Allows headrail installation into recessed mullion cavity
	Pocket Brackets Available on CL blinds	 Hide brackets once mounted Specified for ceiling pockets without mullions Uses spring-loaded brackets
	Perforated Slat Available on CL, CD and CE blinds	 Provide privacy while preserving an outside view Feature a 7% openness factor Available with all slat colors Extended lead times apply
	Two-Position Cord Lock Available on CL and CE blinds	 Restricts blinds to only two settings – fully raised or fully lowered Assures uniform exterior appearance Eases window maintenance Includes ring-pull assembly
	Motorization Available on CD, CE, and H2 blinds	 Reliable mechanisms Motors open, close, and tilt slats

ABOUT HUNTER DOUGLAS

For more than 60 years, we have been fortunate enough to help turn countless innovative sketches into innovative buildings. Architects and designers from around the world have taken advantage of Hunter Douglas' unmatched project development, service, and support. Chances are, you have seen more of Hunter Douglas than you think. Just look around. With major operation centers in North America, Europe, Latin America, Asia and Australia, we've contributed to thousands of high-profile installations, from retail and commercial facilities to major transit centers and government buildings. Not only are the world's architects and designers our partners, they are our inspiration. As they continue to raise the bar for excellence, we're creating projects to bring their visions to life.

COMMITMENT TO SUSTAINABILITY

From products, to processes, to philanthropy, environmental responsibility is a core Hunter Douglas value. We are the worldwide leader in creating innovative, energy-efficient window fashions. Our commitment to minimizing our own impact on the environment includes aggressive plans to reduce energy consumption by 15%, water usage by 40%, and overall carbon emissions by 20% over a three-year period.
